

HIGH PRESSURE PUMP STATIONS

The **HYDROWATT** pump creates flow very differently than all other piston/plunger pumps. Proven ideal for high pressure aggressive/abrasive fluid environments, the **HYDROWATT** pump's ground-breaking radial **AXIFLEX** piston technology will eliminate the high cost and frustration associated with traditional pump technology providing unparalleled pump performance and reliability to your operations.

- **Guaranteed performance with industry leading warranty**
- **Simple and reliable design**
- **Minimal parts and service - all parts stock at HASTEC**
- **Direct drive – no gearbox**
- **Best ROI in marketplace**

The **HYDROWATT** pump is suitable for a wide range of unforgiving low viscosity fluids including all forms of recirculated steel mill water, high water-based hydraulic fluids, HALF, fuels (methanol, diesel fuel).

INDUSTRY	APPLICATIONS
Primary Metals	Descaling
Extrusion/Forging	Press Water Hydraulics
Engineered Wood	Press Water Hydraulics
